this book focuses on the diverse tapestry of families in contemporary u s culture each chapter explores a different kind of family and examines their specific communication behaviors we live in times of increasing diversity that complicate our understandings of ourselves as well as others who may be quite different from us these complexities also impact our definition of family in addition to our interpretation of

family communication behaviors this book provides an examination of family communication practices in families that are underrepresented in the research of the discipline and underserved in u s culture immigrant families family members in interracial relationships lgbtq families low income latinx families families with an incarcerated parent and families headed by grandparents the book is an initial effort to expand the lens of family communication scholarship to focus on families on the margins through a variety of sometimes unique methods including textual analysis in depth interviews and analysis of art projects collected at a pride festival each chapter in this collection adds to our knowledge of how we define family and how families communicate in the 21st century the chapters in this book were originally published in a special issue of the journal of family communication

the ability to learn from experience is a fundamental requirement for intelligence one of the most basic characteristics of human intelligence is that people can learn from problem solving so that they become more adept at solving problems in a given domain as they gain experience this book investigates how computers may be programmed so that they too can learn from experience specifically the aim is to take a very general but inefficient problem solving system and train it on a set of problems from a given domain so that it can transform itself into a specialized efficient problem solver for that domain on a knowledge intensive recently there has been considerable progress made learning approach explanation based learning ebl that brings us closer to this possibility as demonstrated in this book ebl can be used to analyze a problem solving episode in order to acquire control knowledge control knowledge guides the problem solver s search by indicating the best alternatives to pursue at each choice point an ebl system can produce domain specific control knowledge by explaining why the choices made during a problem solving episode were or were not appropriate

the chapters in this volume derive from a symposium held in madrid spain from 6 8 november 1998 organized and supported by the autnoma university of madrid the meeting was part of the activities of the special interest group sig on conceptual change of the european association for research on learning and instruction earli coordinated by the editors of this book the volume brings together contributions from leading researchers investigating the role of conceptual change to enhance meaningful learning in the classroom the aim of the volume is to present the state of the art on a topic that has become very relevant to explaining how students and people in general build their knowledge and incorporate new concepts and ideas the volume keeps the four main sessions in which the symposium was articulated they were structured around both theoretical and practical issues of conceptual change particular attention was paid to discussing the characteristics of individuals prior knowledge and to the more recent topic of how to integrate social motivational and contextual aspects of learning within conceptual change research parts 1 and 2

mounting attention in the research literature has been paid to the roles of social cognition and affect in the communication process this tightly knit collection presents the most current original research in this area from leading researchers in communication and psychology the volume presents a well integrated account of important interdisciplinary approaches to communication processes cognitive processes and behavior
